

What Is CADecore??

It is a platform which will justify your designing skills. It is basically based on designing software named AUTOCad, which is used to create the computer aided designs or software applications including drafting.

RULES::

- There will be two questions that we will provide at the time of the event.
- You have to bring your laptop with AUTOCad installed in it.
- Any technical problem in your laptop will be your responsibility.
- Keep your laptop fully charged and try to bring the mouse with you.

JUDGING CRITERIA::

- The one who submitted the drawing first will get more priority.
- Dimensions should be same as provided in the question.
- Accuracy of the participant will be considered.
