

## **DRAFT RITZ**

### Description

“Design is a fundamental human activity, relevant and useful to everyone. Anything humans

create—be it a product, communication or system—is a result of the process of making

inspiration real. ” Maggie Macnab,

For the society to benefit from the latest advances in technology, skilled engineers and novel designing techniques will be required.

DRAFT RITZ is the annual designing competition under ASME NIT SILCHAR CHAPTER and it returns again at TECNOESIS 2020. In this competition, you will be able to test your imaginative skills to design the problem statement within the shortest time. You will be able to visualize your vision coming to life in front of you and be amazed by your capabilities. It will create interest among young innovators towards a very healthy approach to designing anything in your future and you will be able to open the unknown aspects of your brain to complete the design in the shortest possible time.

So do come and participate to test your knowledge and train yourself for future ventures in designing. Also, there are exciting prizes to grab upon.
